
LET'S TALK MISTRY

by Ar. Sharukh Mistry @ SOA - DSATM

28th April 2017

Ar. Sharukh Mistry

- **Mr. Sharukh Mistry**, one of the most **well-known Architects in India** and founder of Mistry Architects. Even before **sustainability** became a buzzword, he implemented **green practices** in all his projects.
- His works range from Tsunami rehabilitation projects and SOS Children's villages to giant exhibition centers and luxury hotels. Yet Mistry and his team interact with every stakeholder involved, including stones and trees. Another striking feature in his works is the integration of craftsmanship of local people or tribal.
- Ar. Mistry, loves to experiment with recycled products and natural materials. He draws an inspiration from everything around him.
- He has several accolades to his credit, beginning in **1998 by winning the best architect award in India**, he and his team went on to bag several national and international awards for their innovative buildings designs.

Ar.Mistry &
About his work

Ar.Mistry & his associates with SOA-DSATM

Ar.Mistry conveyed that, one has to think about the place and context before going into the technical details of any project, which is clearly explained in the design process of SOS villages and many other project executed by his team. He inspired students to think beyond the materials like glass, concrete and opened their minds towards sustainable materials. We thank our principal and management for giving us an opportunity to host this talk.
